**DRIVEWISE IS A LEADING PROVIDER OF ROAD SAFETY EDUCATION THAT CAN BE CUSTOMIZED AND OCCUPATION-SPECIFIC**

## Our Programs

### Program Features:

- Standardized training for each participant
- Engaging interactive training environment
- A DriveWise facility or yours
- Program loading of 10 participants per program
- Standard 4 hour length
- Optional in-vehicle modules

### Program Customization For:

- Occupation, including general occupation risk related to vehicle operation
- Fleet risks
- Operating environment
- Class of vehicle and vehicle dimensions

### Custom Learning Services:

- Customized programs
- Instructional design services
- Experienced instructors
- Certified trainers
- Occupation-specific programs
- Seasonal learning

### Other Products:

- Engage Design™
- Fully equipped mobile classroom
- Virtual reality simulators
- Classroom Performance System
- Mobi System
- 6 Star Approach™

### Support Services:

- 24/7 tech support
- Secure data collection
- Client care services
- Maintenance training
- Online support

## Our ROI:

DriveWise maximizes your product life cycle by helping with every stage of development. From the initial planning stages through to maturity, DriveWise can design and develop programs, stay up-to-date on courseware and offer continual support services.

### Instructional System Design

DriveWise offers customized programs to assist in all aspects of training and standardization.

### Integrated Learning

DriveWise uses an integrated approach to teaching that includes one or multiple methods: online learning, classroom lectures, virtual simulation and private in-car lessons.

### Centralized and secure data collection & courseware repository

Track the progress of remedial training, pre-hire screening and practical reinforcement through a customizable reporting system accessed online.

### Custom Learning Solutions:

- Custom-developed programs
- Instructional design services
- Occupation-specific programs
- Seasonal learning
- Certified trainers
- Experienced instructors

## eLearning can be used for:

### PRE-HIRE SCREENING

- Separates the good drivers from the great ones
- Assesses participants using a randomized online quiz
- Evaluates participants' defensive driving techniques using standardized simulation exercises or in-vehicle testing
- Streamlines your operational process

### NEW HIRE

- Standardized training that incorporates simulation training and evaluations
- Customized programming for fleet-specific training
- Individual and/or group assessment and evaluation reporting

### RECURRENT TRAINING

- Improved overall fleet safety and ensured due diligence
- Program content focused on individual fleet needs
- Interactive content delivered in a classroom setting
- Practical training on simulators

### REMEDIAL TRAINING

- Online learning modules specific to remedial need
- Classroom and simulator training one-on-one or in a group (option for in-vehicle)
- Record of training and evaluative outcomes
